

Construction Site Parking

Inspection Division Information Handout #G6

The purpose of this guide is to outline the City's regulations with respect to street parking during construction.

Prior to excavating a property, it is requested that contact be made with the Parking Enforcement Office to discuss truck holding areas. Please have the Site Foreman contact the Parking Enforcement Supervisor at 604.904.7378.

Signed Building Zones

If a building zone is required on a portion of the street adjacent to the site, a signed Building Zone will be required. Please contact the City engineering department at 604.983.7333.

- ❑ Building Zones are permitted for the express purpose of construction activities such as the delivery of materials.
- ❑ Contractors, employees and visitors to the site are not permitted to park in these zones.
- ❑ Dump trucks, cement trucks, or other large vehicles should not double park or block the flow of traffic.

Should it be necessary, you may also make application to the City Engineering Department for a permit to close the street.

Site Parking

Contractors, employees and visitors to the site will be subject to all posted time restricted parking, no parking and no stopping zones as well as all other regulations contained within the City's Street and Traffic Bylaw. Parking tickets will be issued and multiple offenders will be towed.

Material Storage

Street Occupancy Permits are required for every development utilizing public property for the erection of fencing or hoarding, or the placement of construction trailers etc. At no time should materials be stored or work of any kind take place on the road or sidewalk unless a street occupancy permit has been obtained from the Community Development Department. For more information please contact 604.983.7355.
