THE SECOND CENSUS RELEASE PROVIDES INFORMATION ON AGE, HOUSEHOLD, AND DWELLING CHARACTERISTICS. It is the first Census to ask both sex “at birth” and gender, allowing all cisgender, transgender, and non-binary individuals to report their gender.¹

Canada is the 1st country to publish data on gender diversity in a national census

1 out of every 300 Canadians identify as transgender or non-binary

Millennials are the fastest growing generation in Canada and represent the largest share (33.2%) of the working-age population

Projections show by YEAR 2050 there will be 3x more seniors aged 85+

WHY IS THIS IMPORTANT?

Understanding age and gender characteristics enables the City to better prioritize funding, support services, and programs around the demographic needs of our community.

¹ Gender diversity data is not provided at the City scale, only at higher levels of geography. ² Millennials represent those born between 1981 and 1996.
Over the last 20 years in the City...

More diversity of housing forms

More families living in apartments

Today, 3 out of 4 units are multi-family
(Row Homes, Apartment Buildings)

• Single-detached house
• Semi-detached house
• Row house
• Apartment or flat in a duplex
• Apartment in a building that has fewer than five storeys
• Apartment in a building that has five or more storeys

WHY IS THIS IMPORTANT?

Understanding household characteristics and dwelling types in the City is essential for identifying housing needs and developing policies to address gaps.
