

Harry Jerome Community Recreation Centre Project

A VIBRANT SOCIAL HEART OF OUR COMMUNITY

PROJECT UPDATE JUNE 2024

Executive Summary

The New Harry Jerome Community Recreation Centre Project and Silver Harbour Seniors' Activity Centre (HJCRC/SH) continue to be the largest investment in community recreation in the city to date. When completed, it will provide more than 18,580 sq.m. of inclusive and accessible community space to support our community's physical, mental and social well-being. Construction continues and will focus on preparing for the installation of the steel components.

Stormwater System

In order to meet the City's stormwater management requirements, the HJCRC and SH project has adopted a variety of source control methods such as interconnected rainwater collection ponds, rainwater catch basins, piping network, detention and retention tanks, and a passive water quality treatment system combined with a pre-treatment structure prior to discharging into the municipal storm sewer.

The HJCRC stormwater outfall that goes into Wagg Creek begins at a small pool. A partnership between the North Shore Rain Garden Project, The North Shore Streamkeepers, and The City of North Vancouver has enhanced the pool, transforming it into a rain garden by planting native flora that intercepts water before it is carried downstream.

Wagg Creek Rain Garden - July 2023
