share the journey

BIKE-RELATED ROAD MARKINGS & SIGNS

LOOKTHINKGO is a City program encouraging all users to safely share our streets and pathways. Here are bike road markings and signs you may encounter on your route.

BIKE BOX

A painted *Bike Box* at an intersection is where cyclists wait ahead of traffic. Motorists stop behind the box and cannot make a right turn on red if there are cyclists in the box.

ELEPHANT'S FEET

Elephant's Feet are dots parallel to crosswalk markings that tell cyclists they do not need to dismount as they would on a regular crosswalk. Cyclists should slow down and only cross when it is safe.

DIAMOND-AND-BIKE SYMBOL

The *Diamond Symbol* means that a lane is reserved for a specific use. When it is paired with a *Bike Symbol*, it means the lane is reserved for cyclists. Cars, buses and motorcycles are not permitted to travel or stop in this lane unless making a right turn onto a cross street.

PAINTED BUFFER ALONG A BIKE LANE

A *Painted Buffer* increases the gap between vehicles and cyclists. Cars should not park or travel in a *Painted Buffer*.

BIKE-RELATED ROAD MARKINGS & SIGNS

SHARROW SYMBOL

Sharrows are used where cyclists share the lane with motorists, either in single file or side-by-side. They guide cyclists to the safest place on the street to ride and inform drivers to share the lane with cyclists.

BIKE DETECTOR

The *Bike Detector* tells the traffic signal when a cyclist is waiting for the light to turn green. Line up your bicycle wheels with the lines on either side of the bicycle detector symbol to trigger the green light.

GREEN PAVEMENT

Green Pavement highlights areas where bicycles and cars cross paths. The *Green Pavement* alerts both drivers and cyclists to pay extra attention.

SHARED PATHWAY

Off-road paths such as greenways with the *Shared Pathway* symbol are shared by pedestrians and cyclists. When cycling, yield to pedestrians.

DESIGNATED BIKE/WALKING ROUTE

These signs show that you are on a *Designated Route*.
